

# StockTake <sup>LIVE</sup>

StockTakeLive is a simple-to-use, fast & efficient stocktake solution which uses barcode scanning to speed up the task of stock counting. It minimizes the manpower for stock counts, reduces re-counting and related errors and provides prompt & transparent visible stock take information for financial audit and verification, which in turn allows companies to reconcile stock and make necessary adjustment instantly after stock take.

The solution is specifically designed to execute a paperless inventory count through a cloud based application combined with android device. It dramatically reduces the throughput time compared with traditional stocktakes and does not require major investments in hardware or software.

## StockTakeLive Features

### Stock taking with Android

Simplifies stocktaking task with simple user interface for your Android device

### Complete Control of PI Count Schedule

Administrator have a complete control of stock count schedule via an application dashboard.

### Reduced Stocktake Process Time

Significantly reduces stock count time and improves accuracy by doing physical inventory count by scanning barcodes.

### Lower Manpower Cost

Requires less staff to scan items, process and manage stock counts. Multiple employees can do stock taking at the same time in different parts of the store/warehouse.

### Less Recounts and Repeat Scans

Scanning made faster with barcodes, less error prone and more accurate. Reduces the time wasted on recounts and repeated scans.

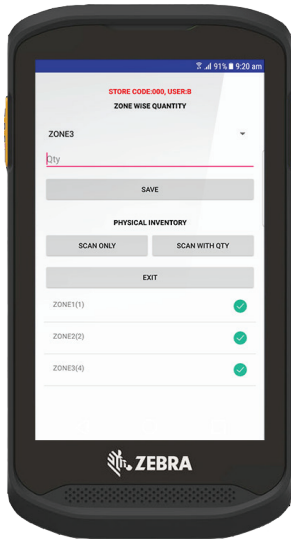

### Remote Stocktake Management

Able to manage and control your stock take from anywhere.

## Stock Count App for Android Devices

Capture Physical inventory on a handheld scanner for stores & warehouses and send them directly to Retail Pro 9

- The simple screens make it easy to train your staff.
- Optimized for Android Devices
- Easy to configure application, quick to implement process & low cost to execute stock takes
- Quick Data import and export
- Categorize scans into “Zones” on the device
- Allows multiple Zones on the same device
- Enables the administrator to direct the count teams efficiently for the locations, optimizing time utilization
- Cost savings through reduction of count cycle.
- Physical Inventory supports both Open and Blind Counting methods
- Upload the PI count data to Retail Pro directly once done
- Discrepancies in the stock take are handled in the Windows application which makes it easier for the admin to do recounts/rescans for the particular zone.

## Hardware & Software Requirements

- Retail Pro Workstation or Server
  - ✓ Retail Pro® 9
- StockTakeLive Windows Application
- Android Scanning Device
  - ✓ Android version 7.0 & above
- StockTakeLive Scanner app installed on the android device
